

Earthquake Preparedness Workshop

Raise awareness with practical tips & advice

Lately, a series of large earthquakes have shaken the world, causing casualties, structural damage and financial destruction. California is located in a seismically active zone and experts have predicted that a big earthquake will occur in the next decades. Since earthquakes occur without warning, we **MUST** prepare!

Do you know:

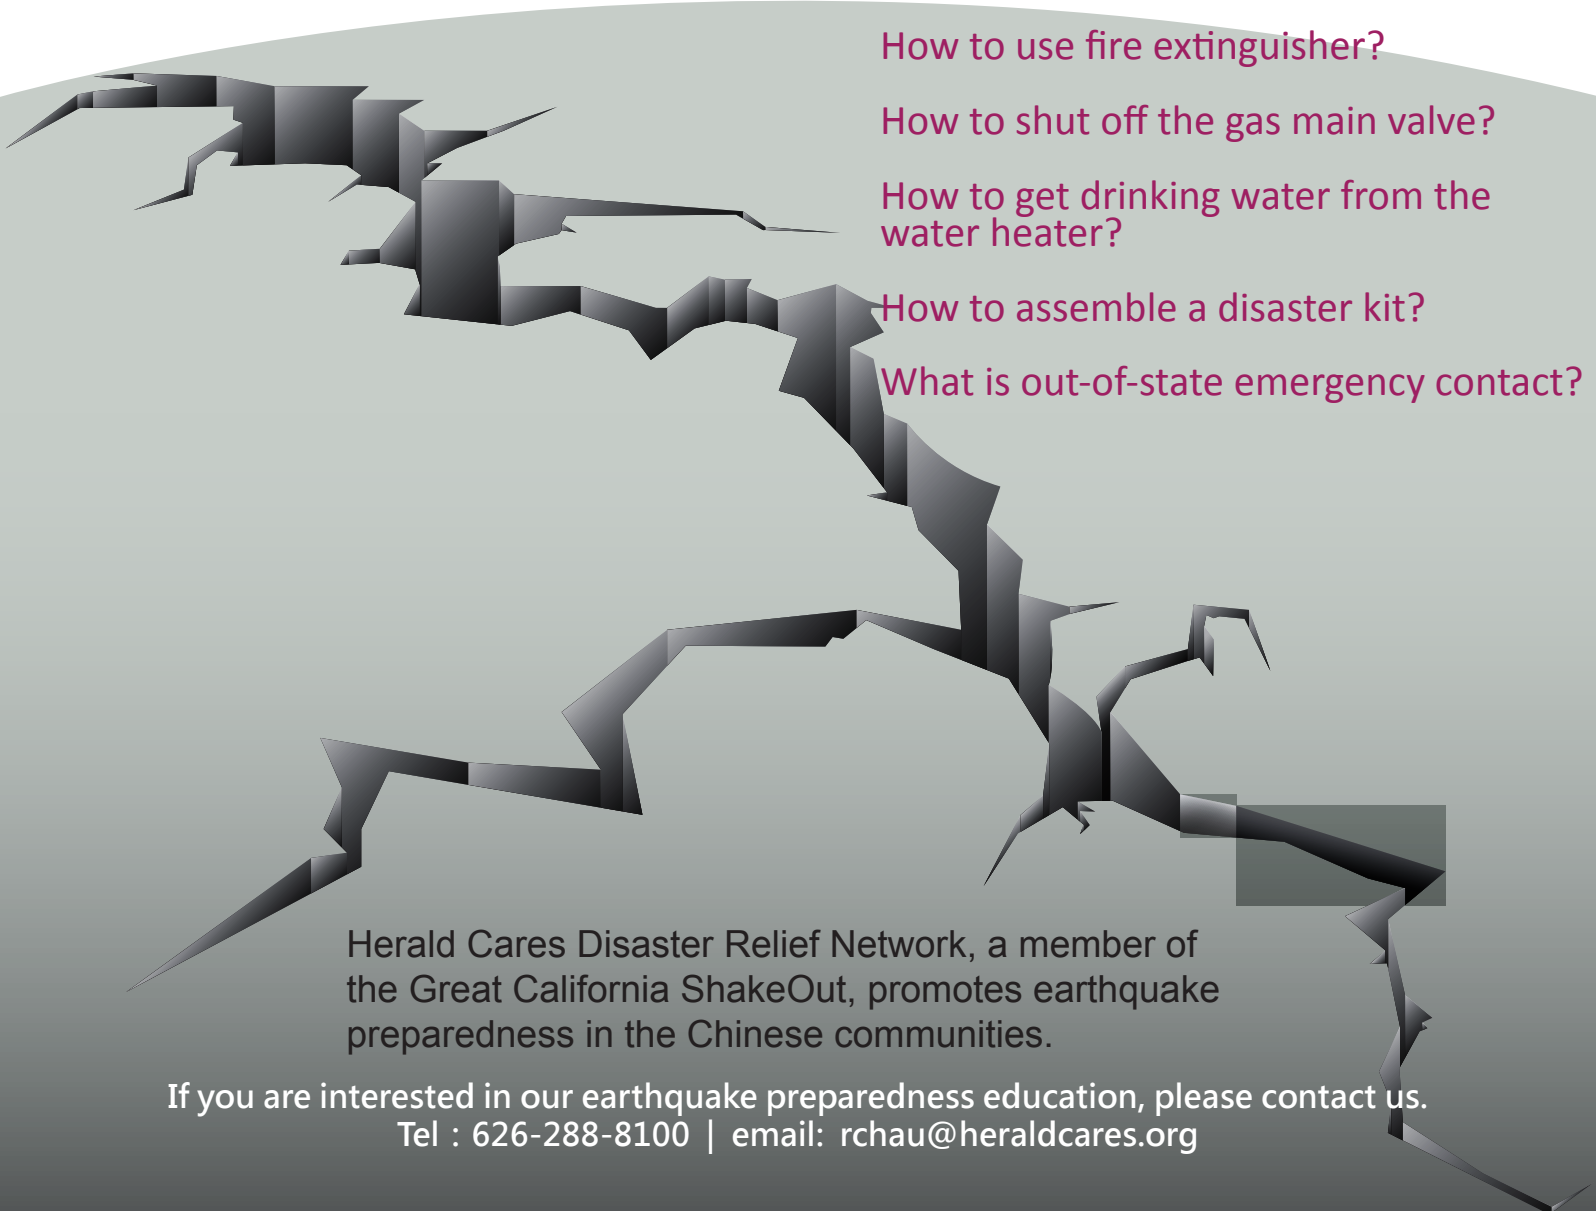

How to use fire extinguisher?

How to shut off the gas main valve?

How to get drinking water from the water heater?

How to assemble a disaster kit?

What is out-of-state emergency contact?

Herald Cares Disaster Relief Network, a member of the Great California ShakeOut, promotes earthquake preparedness in the Chinese communities.
